

- An award-winning business transformation company
- Delivering world-class competitiveness and productivity to UK manufacturing
- Government and industry exemplar partnership

Investing in Productivity and Growth

Sharing in Growth are business transformation experts in the complex world of advanced manufacturing. With over 2,000 years' industrial experience, our team applies global best practice, enabling UK companies to create sustainable growth.

Established in 2013 to provide intensive transformation support to accelerate business growth. Having secured over £4.8 Bn of UK work with Aerospace companies, our clients now support all the key manufacturing growth sectors, including Offshore Wind, Defence, and Nuclear.

“The degree of change we have undergone in four years with Sharing in Growth is unprecedented in our 126-year history and has played a big part in transforming our company into a globally competitive organisation securing work for 200 employees.”

Steve Kirk,
Managing Director

“Sharing in Growth is an excellent example of the government and engineering working together to make our industry more effective, more efficient and future-proofed. This is increasing opportunity, sales and jobs.”

Andrew Churchill
Executive Chairman

Our Approach

Our award-winning approach balances the need to drive clarity of purpose, the environment to get work done efficiently, whilst increasing the engagement of the team.

This approach has been proven to succeed at both company and value stream levels. This is delivered by a team of circa 100 full-time experts integrated with nationally recognised specialists. Our team members are deployed into the clients, working shoulder to shoulder with the local workforce; training, coaching, and mentoring to address their specific ambitions and diagnosed challenges. Project scopes have included; strategy development, operational excellence, productivity, culture, business development, and new product introduction.

As a not-for-profit organisation, we are motivated by the transfer of knowledge and capability to enable ambitious supply chain companies to grow and compete internationally.
